

The only true landed cost

Quote accurate duties, taxes, and fees, with the ability to prepay

Duty and tax quotes are often miscalculated, missing fees, and alone are not enough to get your shipments delivered, leaving consumers frustrated due to delays or additional fees upon delivery. Instead, build trust with transparency on your international orders by quoting and collecting the total landed cost while maintaining complete control of your business. Zonos provides the most accurate landed cost, calculated with HS codes and country-specific de minimis values, all backed by our in-house trade data for maximum accuracy, so you don't over or undercharge your customers.

Ideal for: anyone doing cross-border business, shipments, or sales

Landed cost features

- Landed cost quotes including:
 - Import duty
 - Import tax
